

## TANKLEENOR

Petroleum Tank Cleaning System

## **TANKLEENOR**

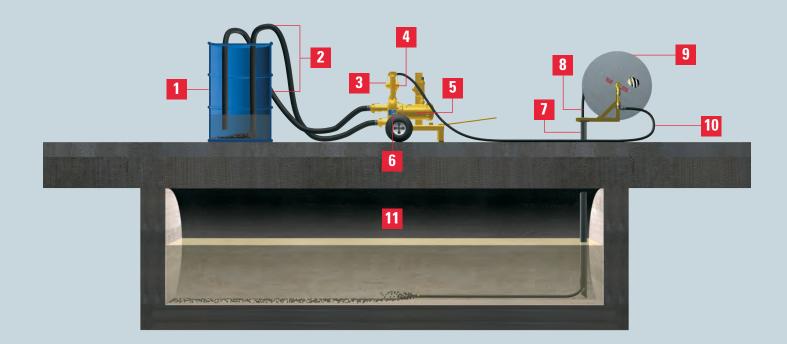

#### Pump Specifications

Suction: 2" (50 mm) Discharge: 2" (50 mm) Max Solids: 0.375" (9.5 mm) Materials of Seal Type: Self-lubricated, Mechanical Construction: Cast Iron, Copper Alloy Gorman-Rupp's Tankleenor provides quick, efficient and economical cleaning of petroleum storage tanks. The unit is a lightweight, wheel-mounted cleaning system designed for one-man operation and is easily moved from job to job.

#### **Tankleenor Provides Efficient Petroleum Tank Cleaning**

Even when tanks are thought to be free of moisture and foreign debris, they often contain enough water and other contaminants to degrade the stored product. The Gorman-Rupp Tankleenor can remove contaminants including gel precipitates, microbial growths, rust and water, without disturbing the product or taking the tank out of service. Operating liquid drawn from the contaminant tank circulates through the pump and creates a vacuum at the eductor. The vacuum draws moisture and contaminants through the cleanout hose and back to the eductor, where it mixes with the operating liquid and is carried to the contaminant tank.

The Tankleenor unit features a Gorman-Rupp O Series<sup>®</sup> pump with explosion proof motor, reel and hose assembly, connector hose, suction and discharge hose, guide tube and ground wire.

- 07 | Guide Tube
- **08** | Hose Assembly
- 09 | Reel Assembly
- **10** Connector Hose
- **11** | Storage Tank

### The Gorman-Rupp Tankleenor Comes Complete With:

#### **Pump**

At the heart of this system is a 2" Gorman-Rupp O Series® self-priming centrifugal pump with Viton® or Buna seal, close-coupled to a 1 HP Class 1, Group D, single phase explosion-proof TEFC electric motor with 50' (15 m) of 12 gauge, type SO cable.

The pump is equipped with a venturi-type eductor which permits recirculation of the operating fluid without contaminating the tank, and a handoperated valve for backflushing. The discharge and suction ports of the pump are fitted with quickconnect couplers.

#### **Reel Assembly**

A detachable reel assembly is provided for storing the unit's hose and controlling its direction and travel rate. The reel assembly is fitted with a built-in sight tube which enables the operator to locate and remove pockets of contamination.

#### **Connector Hose**

A 6' x 0.75" (2 m x 19 mm) connector hose is provided to connect the pump eductor and valve to the reel assembly.

#### **Hose Assembly**

Hydrocarbon-resistant hose, 0.625" diameter by 42' long (16 mm x 13 m), comes standard with a spring steel integral strap insert and a specially designed nozzle.

#### **Suction And Discharge Hoses**

The included 1.5" x 15' suction and discharge hoses are fitted with quick-disconnect couplers to mate up with the pump suction and discharge couplers.

#### **Adjustable Guide Tube**

A stainless steel quide tube, with spring-loaded foot (which adjusts from 7' to 13.5" long) comes standard.

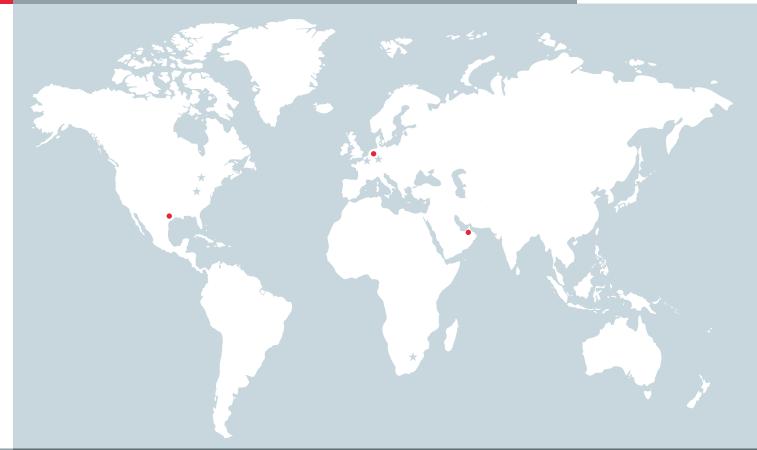

#### **Ground Wire**

Wire is 10' (3 m) long, with clip, for grounding unit.

#### **Optional 50 Hz Motor**

For 50Hz operation, Tankleenor is available with 1.1kW (1.5 HP), Class 1, Group D explosion-proof, 50Hz, 115/220V, single phase TEFC electric motor.
